

# Reparation Liability Tokens (RLT)

— Clarified Blueprint (Interest-Only Phase)

**Date:** 11 October 2025

**Prepared by:** IC3CSI (IC3 Crime Scene Investigators)

**Contact:** [ic3csi.com](http://ic3csi.com)

## 0) One-Sentence Summary

**IC3CSI will only:** (a) **promote** the Reparation Liability Token (RLT) concept, and (b) **collect and maintain a registry of interest** (expressions of support). **IC3CSI will not** build, run, own, or administer technical rails, standards, adjudication, treasury, identity, or smart contracts. Those functions belong to the future **International IC3 Black Entity (IBI)** and/or its designated providers.

---

## 1) Purpose of This Document

- Provide a clear, copy-ready description of RLT and the current limited role of IC3CSI.
- Invite entities to **register interest** only—i.e., to publicly signal support for the RLT idea and the establishment of the IBI.
- Defer **all** operational, technical, adjudicative, and treasury functions to the IBI (Phase 2) or its appointed vendors.

---

## 2) What RLT Are (Concept)

**Reparation Liability Tokens (RLT)** are envisioned as **non-transferable, burnable** tokens that would **measure an entity's outstanding reparatory liability over time**. When real, verified remedies are delivered (e.g., payments or approved credits), the corresponding RLT would **burn**, reducing the outstanding balance.

### Key conceptual properties

- **Non-transferable:** Bound to the responsible entity; not for trading.
- **Burnable:** Decrease as verified remedies land.
- **Adjustable under due process:** Evidence-based increases/decreases governed by formal rules.
- **Publicly auditable metrics:** Liability visibility with privacy safeguards for sensitive evidence.

*(All mechanics are conceptual at this stage and will be governed, if adopted, by the IBI.)*

---

## 3) IC3CSI's Scope (What We Do Now)

IC3CSI is **limited to communication and interest-capture activities**:

1. **Promote the RLT concept** to organisations, institutions, communities, vendors, and the public.
2. **Operate a simple registry of interest** that records expressions of support for the idea and for establishing the IBI.
3. **Publish non-technical updates** (e.g., lists of supporters by sector/region, high-level FAQs, media statements).
4. **Coordinate introductions** between interested parties and the future IBI (once established).

### Data we may collect for the registry of interest

- Organisation or individual name; sector; country/region.
- Public contact (email/website).
- A short, public **Statement of Support**.
- Optional tags (e.g., “corporate,” “charity,” “municipality,” “university,” “faith group,” “vendor”).

- Optional “readiness notes” (e.g., *wants to explore pilots when IBI launches*).

#### Format

- Lightweight, off-chain list (e.g., CSV/CRM).
  - Public supporter roll (names + statements) where consented; private contacts stored securely.
- 

#### 4) Out-of-Scope for IC3CSI (What We Do Not Do)

- No building/owning/operating of **technical rails** (identity credentials, ledgers, smart contracts, dashboards).
- No **adjudication** of liabilities, **standards-setting**, or **appeals**.
- No **issuance** or **mint/burn** execution of RLT (concept only at this stage).
- No **treasury** operations, custody, proof-of-reserves, or disbursements.
- No **KYC/AML** onboarding or verification systems.
- No “**registry badges**” or credentials—only a **non-credential** list of interest/support.
- No pilot assessments, audits, or transparency reports implying operational authority.

All such activities belong to the **IBI** and/or its appointed providers after establishment.

---

#### 5) The IBI (Phase 2) — Future Owner/Operator

When established, the **International IC3 Black Entity (IBI)** would decide whether and how to implement RLT and associated rails. The IBI would own or mandate:

- **Registration & Standards** (eligibility, due process, evidence, liability schedules).
- **Technical rails** (identity, contracts, ledgers, dashboards).
- **Mint/Burn governance** and policy parameters.
- **Treasury, Audit, Privacy** frameworks and vendors.
- **Investigations, Panels, Appeals** mechanisms.
- **Public reporting** and formal compliance arrangements.

IC3CSI’s role at that time: **communications and referrals only**, unless separately contracted by the IBI for narrowly defined, non-sovereign tasks.

---

## 6) Registry of Interest — Public Call

### Who may register interest?

Corporations, SMEs, public bodies, charities, universities, faith organisations, cultural institutions, professional associations, vendors, and individuals.

### How to register interest

Provide: Name, sector, country/region, public contact, and a short **Statement of Support**. IC3CSI will add you to the registry of interest and, where consented, list your name publicly as a supporter of the concept and the IBI's creation.

### Example Statement of Support (template)

"<Entity Name> supports the development of the International IC3 Black Entity (IBI) and the exploration of Reparation Liability Tokens (RLT) as a transparent, evidence-based way to measure and reduce outstanding reparatory obligations."

---

## 7) Communications Pack (Ready Text)

### Boilerplate (short)

*IC3CSI is promoting a simple idea: measurable, transparent progress toward reparatory justice using Reparation Liability Tokens (RLT). Today, we only collect expressions of interest and public statements of support. Operations, standards, treasury, and any smart contracts will belong to the International IC3 Black Entity (IBI) once established.*

### Boilerplate (expanded)

*RLT are a proposed, non-transferable and burnable accounting unit of outstanding reparatory liability. The concept puts accountability first: liabilities fall only when verified remedies are delivered. IC3CSI is not building or operating rails. We are building a registry of interest—nothing more—so supporters can signal readiness to engage when the IBI is established.*

### Press line (attribution to IC3CSI)

"This is an interest-only phase. We are inviting institutions and communities to publicly support the idea and the creation of the IBI. All operational and technical decisions rest with the future IBI."

---

## 8) Frequently Asked Questions (FAQ)

**Q1. Is IC3CSI issuing tokens now?**

**A. No.** IC3CSI is not issuing, minting, burning, or administering any token or contract.

**Q2. Is IC3CSI running identity, ledgers, or dashboards?**

**A. No.** No technical rails are run by IC3CSI. Those are future IBI matters.

**Q3. Can we pilot RLT before the IBI exists?**

**A. Not via IC3CSI.** You may register interest. Any pilots would be governed by the IBI after its establishment.

**Q4. Where do payments go today?**

**A. Nowhere via IC3CSI.** IC3CSI does **not** take custody of funds. Treasury decisions belong to the IBI.

**Q5. What happens after we register interest?**

**A.** Your support is listed (if consented). When the IBI launches, we will notify it of supporters for appropriate follow-up.

**Q6. Is there a badge or credential for registering interest?**

**A. No.** Registration of interest is **not** a credential. It is a public signal only.

---

**9) Data & Privacy (Interest-Only)**

- **Minimal collection:** name, sector, region, public contact, support statement.
- **Security:** private contact details stored securely; public listing only with consent.
- **Usage:** to publish supporter rolls and to notify the IBI of interested entities.
- **Erasure:** supporters may request removal from the public list or the registry of interest at any time.

---

**10) Next Steps**

1. **Express interest:** Send your details and Statement of Support to IC3CSI.
2. **Join the public roll (optional):** Permit display of your name and statement.
3. **Stand by for IBI formation:** IC3CSI will **not** operate rails; we will pass the supporter registry to the IBI for consideration once it is established.

---

**11) Glossary (Plain Language)**

- **RLT:** A proposed, non-transferable, burnable accounting unit of outstanding reparations—**concept only** until adopted by the IBI.
- **Registry of Interest:** A **non-credential** list of supporters for the RLT idea and the creation of the IBI.
- **IBI:** International IC3 Black Entity—the future sovereign-oriented institution that, if established, would govern all operations.
- **Rails:** Technical systems such as identity, smart contracts, ledgers, dashboards—**not** run by IC3CSI.

---

**Contact:** [ic3csi.com](http://ic3csi.com)

**Statement:** *IC3CSI promotes RLT and keeps a registry of interest—nothing else.*
